

Bourne

In the newest one  
stereotypical bitch  
in charge of X-ing him,

mannish clothes, slicing tongue.  
He has lost his Marie wasted  
by the CIA I'd guess. But

even ole Mannish softens a bit  
& triple-cute round-faced girl gets  
her role expanded and gets, too, romantic.

No way of killing Bourne! Send up  
to a dozen and it's nothing.

More than that: diminishing returns.  
They bump into each other with  
explosive results.

Hope he keeps on going. Why, and  
why the appeal to so many males?  
After all, it's a comic strip

compared to the real evil fostered  
by Washington and underlined in many  
national capitals. Well, majority

of men count beans in quiet  
desparation. So, require Bourne,  
not to mention Rambo.
